

**RE: ELANY ELECTRONIC FILING SYSTEM DASHBOARD RELEASE**

ELANY will soon release a “**Broker Dashboard**,” which has been created to provide members with a status snapshot of the current filing activity. This will be your starting point after successfully logging in to EEFS. We have received very positive feedback from brokers during the test phase.

Members will have an overview of the following types of information:

- Batch Status** – current day’s batch activity, including outstanding binders, stamped documents not accessed, and open suspended items;
- Transactions by Type** – displays the breakdown of transactions created which allows the user to review counts for the current day, week, month or year;
- Returned Batches** – listing of batches that have recently been processed and returned by ELANY. Your most recent return will appear at the top. You will have the ability to change the sorting by clicking on column headers.
- Waiting for Broker** – listing of batches that are currently flagged by ELANY requiring additional information.

Watch for our next bulletin advising of the release date!!

All current ELANY bulletins and other current ELANY publications can be found on our website at <http://www.elany.org>
